No.334/4,Hokandara
North, Hokandara

AREAS OF EXPERTISE

- Object-Oriented Programming
- Web Development
- Cloud Computing
- Database Management
- UML Diagramming
- Agile Project Management, Multi-role Team Leadership

TECHNICAL SKILLS

Programming Languages

- C#, JavaScript (ES6+), PHP, HTML5, CSS3, Typescript, javascript, dart, flutter

Frameworks & Libraries

- Laravel, React.js, Node.js

Databases

- MySQL, MS SQL Server, Supabase

Cloud

- AWS (EC2, S3, RDS, VPC, IAM, CloudFormation, Security Groups, Multi-AZ Architecture, Infrastructure as Code, CloudWatch)

Tools

- GitHub, Visual Studio, MySQL Management Studio, Google Antigravity

Methodologies

- Agile / Scrum (sprint planning, backlog management, retrospectives)

Architecture

- MVC, REST API design, OOP, CRUD, UML diagramming

Documantation

- Architecture Diagrams
- UML Modelling
- Migration Planning Documentation
- Requirements Analysis

PROFILE

Second-year BSc (Hons) Computer Science undergraduate with hands-on full-stack experience across C#, PHP (Laravel), JavaScript (React.js/Node.js), and AWS cloud infrastructure. Delivered projects spanning event ticketing, e-commerce, and multi-tier AWS migration, including leading a 4-person Agile team through a 3-sprint software project. Seeking an internship or entry-level software engineering role to apply these skills in a professional setting.

EDUCATION

Asia Pacific Institute of Information Technology (APIIT) - 2024 - present

- Computing Foundation - completed
- BSc (Hons) in Computer science - In Progress(second year undergraduate)

D.S. Senanayake College Colombo 7 | 2020 -2023

- Completed A/L in Mathematical Stream.(2022/23)

Aquinas College of Higher Studies | 2023 -2024

- Diploma in English Language and Literature

PROJECTS

AWS Cloud Migration & Infrastructure Design | Cloud Architecture Project

(Oct 2025 -Nov 2025) - <https://lnkd.in/p/g7phMFUs>

- Designed and deployed a multi-tier AWS infrastructure (EC2, S3, RDS, VPC) using CloudFormation Infrastructure-as-Code, targeting high availability across 2 availability zones.
- Analyzed an existing on-premises system and produced a full cloud migration plan with cost-optimization modelling, achieving an estimated 30% reduction in simulated infrastructure costs.
- Configured VPC subnets, security groups, and IAM roles to enforce least-privilege access across all services.

Event Ticket Booking System |Full-Stack Web Application

(Feb 2026 - April 2026) - <https://github.com/heshan3939/Eventix.git>

- Built a complete event ticketing platform using Laravel (PHP), MySQL, HTML, CSS, and JavaScript, supporting event creation, seat reservation, and user authentication.
- Implemented role-based access control for Admin, Organizers and Customer views, with real-time seat availability updates and booking confirmation emails.
- Designed a normalised MySQL schema across 6 tables, reducing query redundancy.

PROFESSIONAL SKILLS

- Strong communicator and presenter
- Experienced in cross functional team collaboration
- Analytical problem-solver with structured debugging approach
- Adaptable fast-learner across new frameworks and toolchains
- Proven leadership under sprint deadlines

AREAS OF EXPERTISE

- Full-Stack Web Development
- Cloud Infrastructure (AWS)
- Object-Oriented Programming
- Agile Project Management
- Database Design & Optimisation
- UML & Systems Analysis
- Multi-role Team Leadership
- Technical Documentation

Nestlé Dairy Farming Management System | Agile Team Lead — BA, SM, QA & Developer (Jan 2026 – may 2026) - <https://github.com/Laksan-P/diary-chain-connect.git>

- Led a 4-person team as Team Lead across 3 Agile sprints for a dairy supply chain management system, rotating through Business Analyst (Sprint 1), Scrum Master/Developer (Sprint 2), and QA (Sprint 3) responsibilities.
- Built with Typescript, javascript, dart, flutter, Tailwind CSS, React.js, Node.js, and Supabase (PostgreSQL); produced database schemas, UML diagrams, and sprint documentation.
- Ran stand-ups, sprint planning, and retrospectives; delivered all sprint milestones on schedule.

Event Ticketing System (Desktop) | C# Windows Forms Application
(Apr 2025 – Jun 2025) - <https://github.com/heshan3939/SDAM-FINAL.git>

- Designed and built a Windows Forms desktop app in C# applying OOP principles (inheritance, encapsulation, polymorphism) and MVC architecture.
- Implemented full CRUD operations with MS SQL Server backend, including seat reservation logic, ticket cancellation, and receipt generation.

Computer Parts E-Commerce Web Application | Front-End & Backend Integration
(Nov 2024 – Jan 2025) - <https://github.com/heshan3939/wdos-assignment.git>

- Developed a multi-page web application with HTML, CSS, JavaScript, and localStorage for cart persistence, integrated with a MySQL backend for product and order management.
- Implemented dynamic product filtering, order summary generation, and a responsive mobile-first UI.
